

FEEDBACK ANALYSIS OF STUDENTS 2019-20

INTRODUCTION

Feedback acts as a tool for developing an organization. It is a two-way dialogue which helps the institute or an organisation to go further. Feedback allows the students to reflect on their learning; and provides opportunity to assess their skills and capabilities. It is with the students ideas our institute considers the importance of feedback from all students and takes effective action based on that:

STUDENTS FEEDBACK

To enhance and assure the quality of the educational approaches used to enhance the curriculum, student feedback has been built into the curriculum. This feedback was collected through evaluation forms and consolidated. The overall consolidation reveals that the students have rated the curricular aspects on a positive scale. Students feedback about the course content and adequacy of reading textual material and finally the usefulness of the course to deal with societal problems is considered to be highly essential to enhance the quality of education. In this context, feedback from the students was obtained through administering evaluation form. This exercise helped us to infer that the contents of the course were adequate and sufficient. Further they remarked with the designing of the various courses are highly applicable to face the different dimensions of societal issues. Most of the students were satisfied with the various aspects of teaching like coverage of syllabus in class, emphasis on fundamentals, coverage of modern/advanced topics and overall course. 83.9% students felt that the curriculum is easy and 93.3% students felt that the instructions were easy to follow. 94.4% students commented that the subjects were relevant to job and future aspirations thus indicating that this curriculum provides larger scope for employability. Also the subjects are applicable in practical life. 93.7% students felt that the course helped them in building their personality.

FEEDBACK ANALYSIS REPORT

While there are large number of possible sources of feedback and evaluation of teaching, learning method and other related aspects, the most common source of input for evaluation is feedback from the students.

- Exposure to develop entrepreneurial skills which will help them identify their potential was suggested.
- Skill development and job oriented courses were requested.
- Teaching methods and teaching aids must be improved.
- Exposure to latest developments and advances should be known to the students.
- Counselling and the need for career guidance was insisted.
- Few students suggested that there should be smart learning environment.

CONCLUSION

Institutes make it a regular practice to accept feedback from all stakeholders because they constantly search for ways to make their best even better. The feedback from each group helps us to understand our responsibilities, clarify their expectations and address their general concerns so as to improve the academic environment of the campus.

ACTION TAKEN:

In view of identifying the gap in the syllabus as per the requirement of various stakeholders, the college has taken feedback on curriculum from the students regarding their subject. Suggestions like more smart and experiential leaning and approach to competitive exams, relevant to the framing of the syllabus of various courses were consolidated and discussed in IQAC, then communicated to the subject teacher. It was decided in IQAC to communicate this feedback report to University through BOS members.

As suggested by IQAC following actions were prominently taken-

1. To help undergraduate fresh students understand the challenges and opportunities present in the Institute and to counsel their academic and personal problems.
2. Students are made aware of facilities during Orientation Programs in the beginning.
3. More of industrial visits and field visits are conducted now. Also teachers are asked to undertake more experiential teaching learning process. Teachers are also using PowerPoint presentations for enhancing teaching learning experience.
4. Expert guidance lectures are conducted on different topics of advanced sciences to inculcate interest in subjects.
5. Many faculties are now using ICT for teaching learning purposes to create smart learning environment.
6. Slow learners and advanced learners are given more attention according to their needs.
7. Extension activities for social and environment sensitization are conducted.
8. More career guidance and soft skill development schemes have been implemented.
9. More faculty development programs have been conducted.
10. Placement and guidance cell has been strengthened.
